

## WATER POLO

**In Water Polo, the focus is on developing younger categories of water polo players** through a long-term training process based on elements of water polo skills, tactics, injury prevention, sports education, fitness, competition and additional activities. Such a player approach should create a good basis for top achievements in water polo.

**Main Water Polo goal** is that as many children play water polo as to improve national teams (men's and women's).

Sport connects young people and sport is the best window into the World.

### FOR FOREIGN CLUBS AND FEDERATIONS / ASSOCIATIONS :

If your ambitious Club / Federation needs even more growth and development, I can contribute to that with my great work, rich professional (swimming and water polo skills education) and organizational (organization of sports clubs, schools, associations, competitions, etc.) experiences.

Also, I am ready to educate swimming and water polo coaches so that the knowledge/skills will remain in every place/city/pool/country where I would potentially work. Also, I am ready to educate future water polo referees, delegates, official timekeeper and score manager because their role is important in the development of water polo.

### CAREER OF WATER POLO COACH IN REPUBLIC OF SERBIA:
